Using Python Django.

Examples:

Standard user trying to access confidential files

They can view, but not update.

Update Confidential

Title:

Text:

[Cancel](#)

Manager trying to access confidential files.

Confidential

- Top secret - [View/Update](#)
- fdsa - [View/Update](#)
- fdsaf - [View/Update](#)

Create new Confidential file

Title:

Text:

Upload

They can create, view and update, but can't delete

✓ Confidentially successfully saved

Confidential

confidentially successfully saved

- Top secret - [View/Update](#)
- fdsa - [View/Update](#)
- fdsaf - [View/Update](#)

Create new Confidential file

Title:

Text:

Upload

If I call delete route directly as a manager I get forbidden page:

http://127.0.0.1:8000/confidential/3/delete

403 Forbidden

More examples are included in Demo.
